How to Import-Export Forms with Paymattic

Import - Export · https://paymattic.com/docs/how-to-import-export-forms-in-wordpress-with-paymattic/

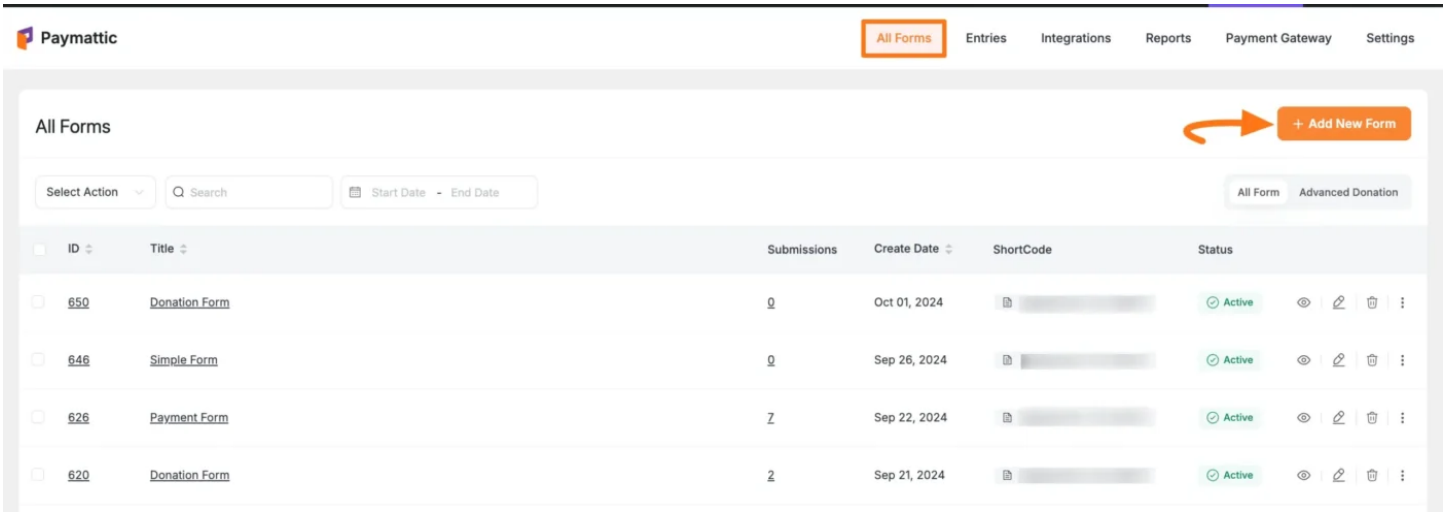

Paymattic allows you to Import and Export forms between websites and saves you from the hassle of creating new forms. This article will guide you through the process of how you can **Import** and **Export** your forms through **Paymattic.**

Importing Forms

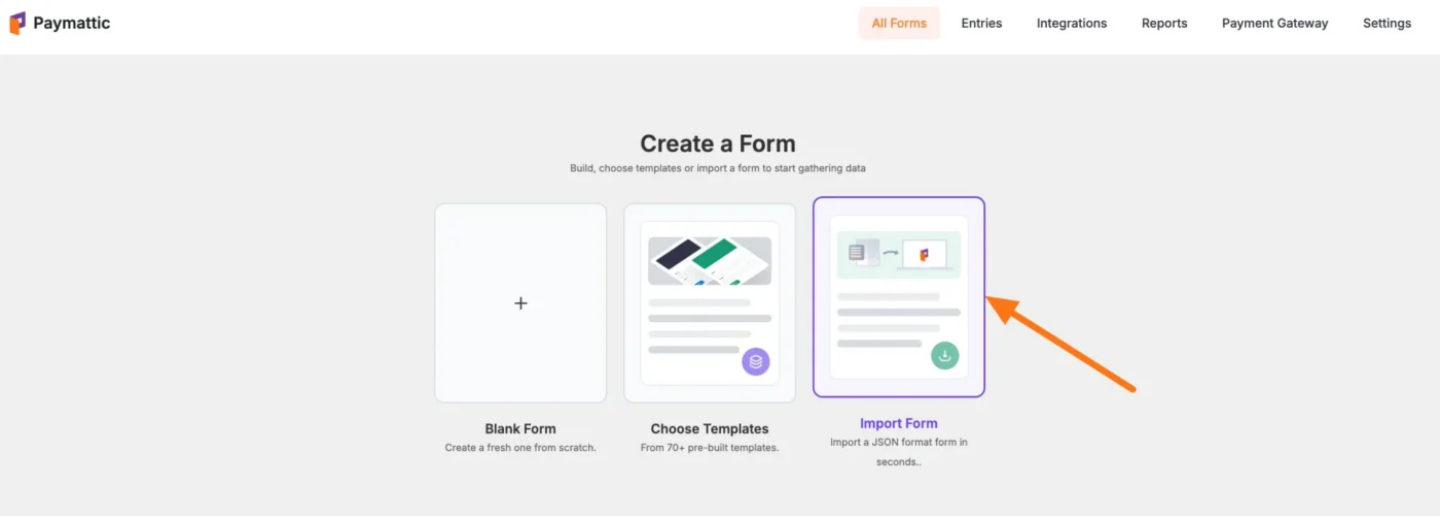

To learn how you can Import forms from other platforms to Paymattic, follow the steps with the screenshots below –

First, go to **All Forms** from the **Paymattic Navbar** where you have all your existing forms.

Now, click the **+ Add New Form** button to Import a new form.

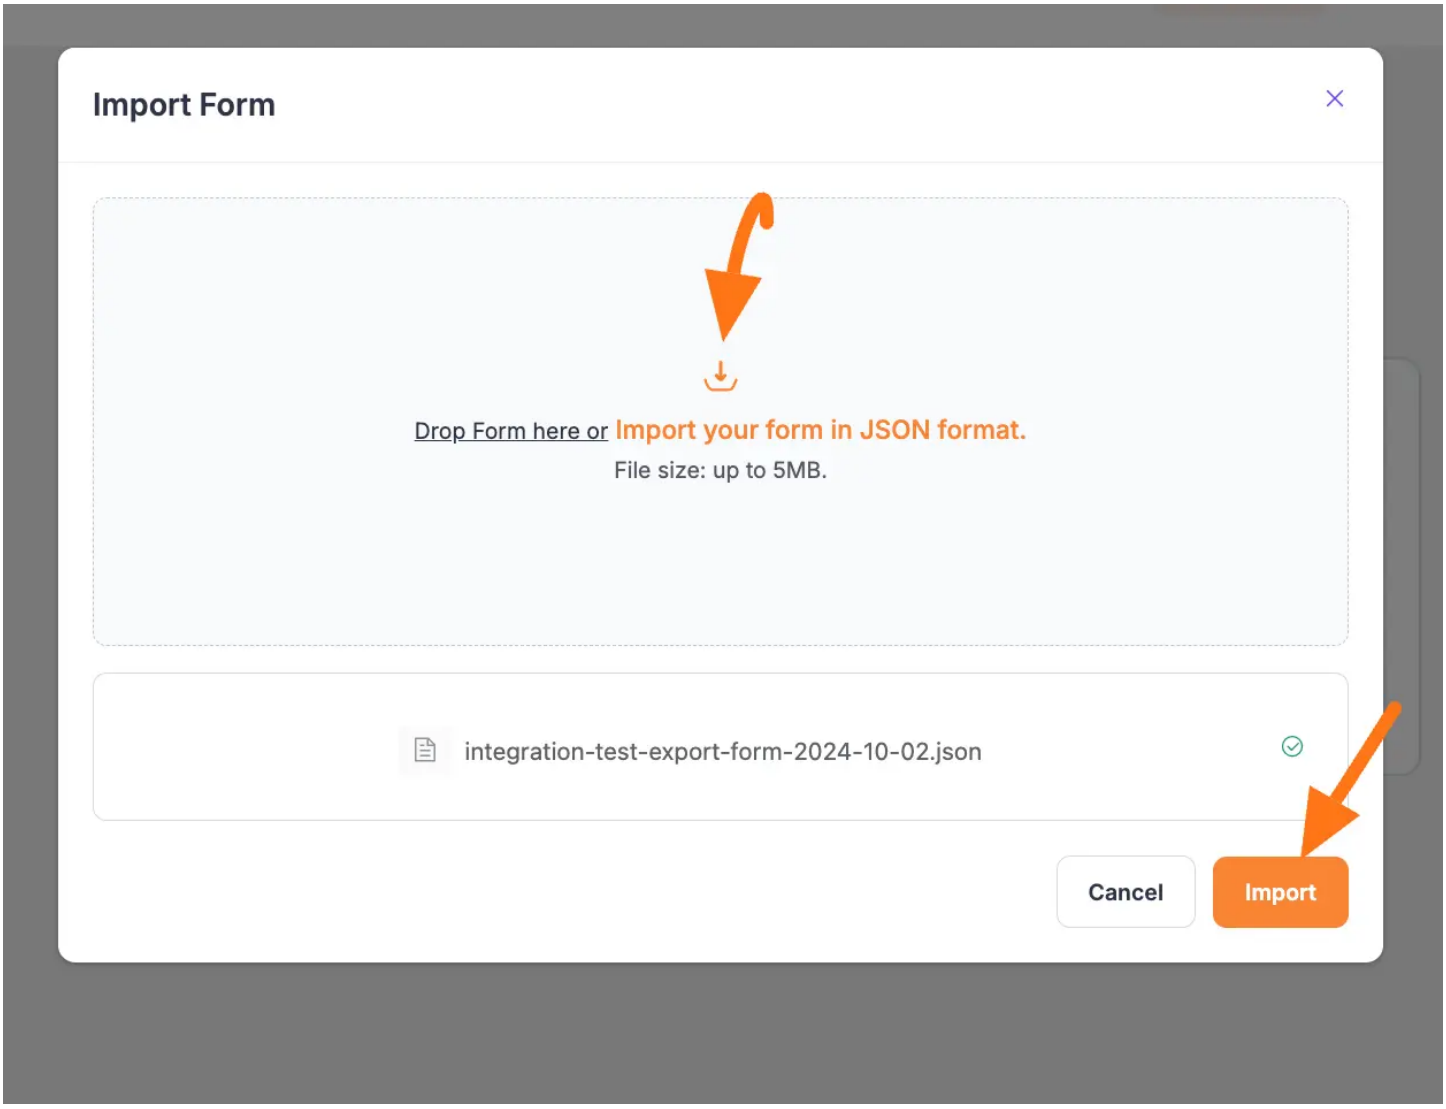

Now, click the **Import Form** tab as it allows you to import your JSON format forms from other platforms to Paymattic.

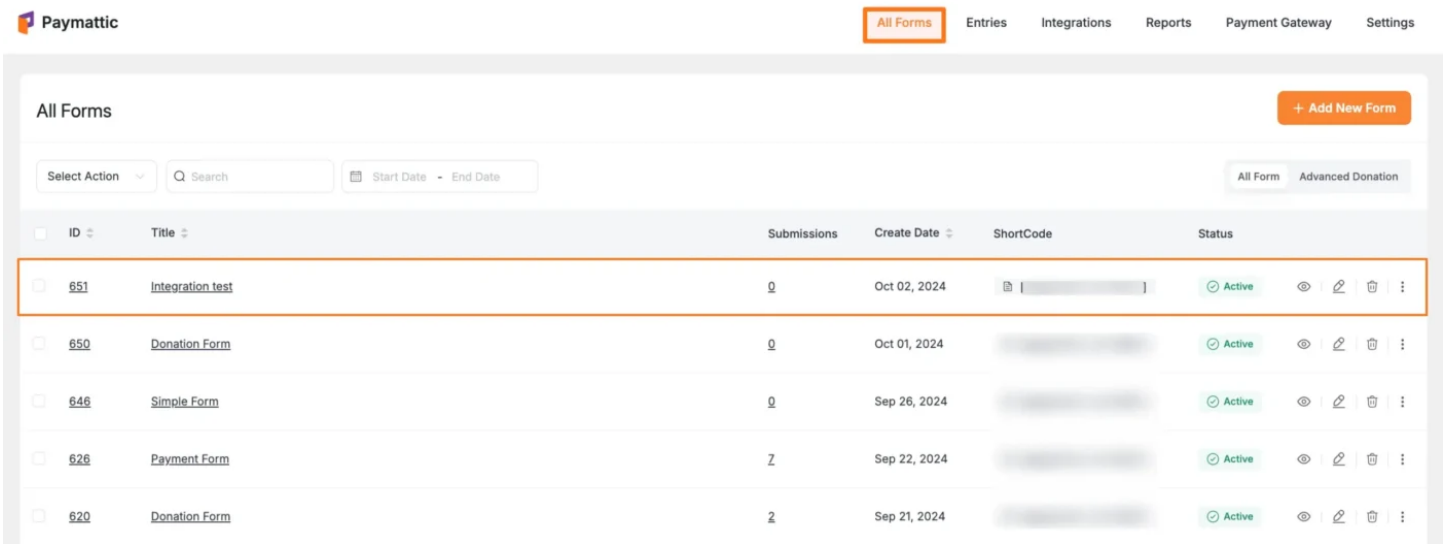

Now click the **Download Icon** to select the desired form from your device.

Once you choose the form, click the **Import** button.

“**Remember**, the form file must be in JSON format to import into Paymattic.”

Here, you can see that the **form** is **imported successfully** and added to **All Forms** sections.

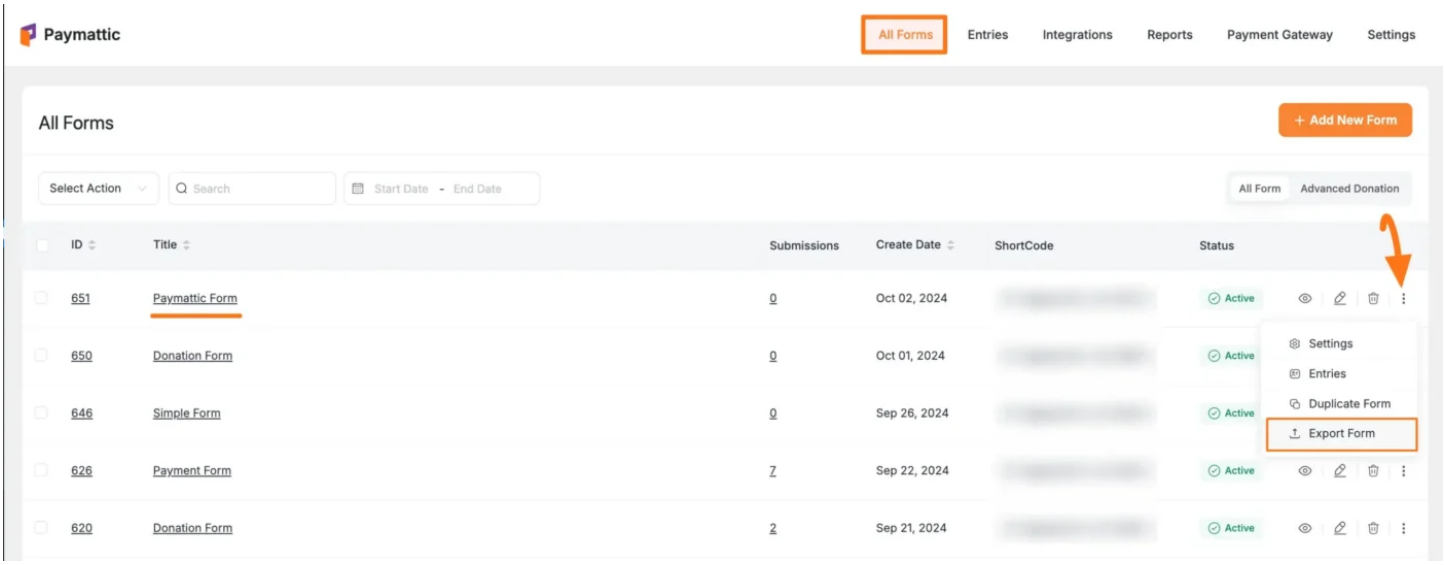

Exporting Forms

To learn how you can Export forms from Paymattic to other platforms, follow the steps with the screenshots below –

First, go to **All Forms** from the **Paymattic Navbar** where you have all your existing forms.

Now, click the **Three-dot-icon** option of the desired form you want to export, and press the **Export Form** button. And, your form will be exported in JSON format.

This way you can easily Import/Export as many forms as you want in Paymattic!
