How to Integrate Viva Wallet With Paymattic?

Payment Methods · https://paymattic.com/docs/how-to-integrate-viva-wallet-with-paymattic/

With Paymattic, you can easily integrate the Viva Wallet payment method to accept payments. This article will guide you through configuring Viva Wallet on your WordPress Site with the Paymattic plugin.

Remember, to get access to the Viva Wallet payment gateway, you need the Paymattic Pro Plugin.

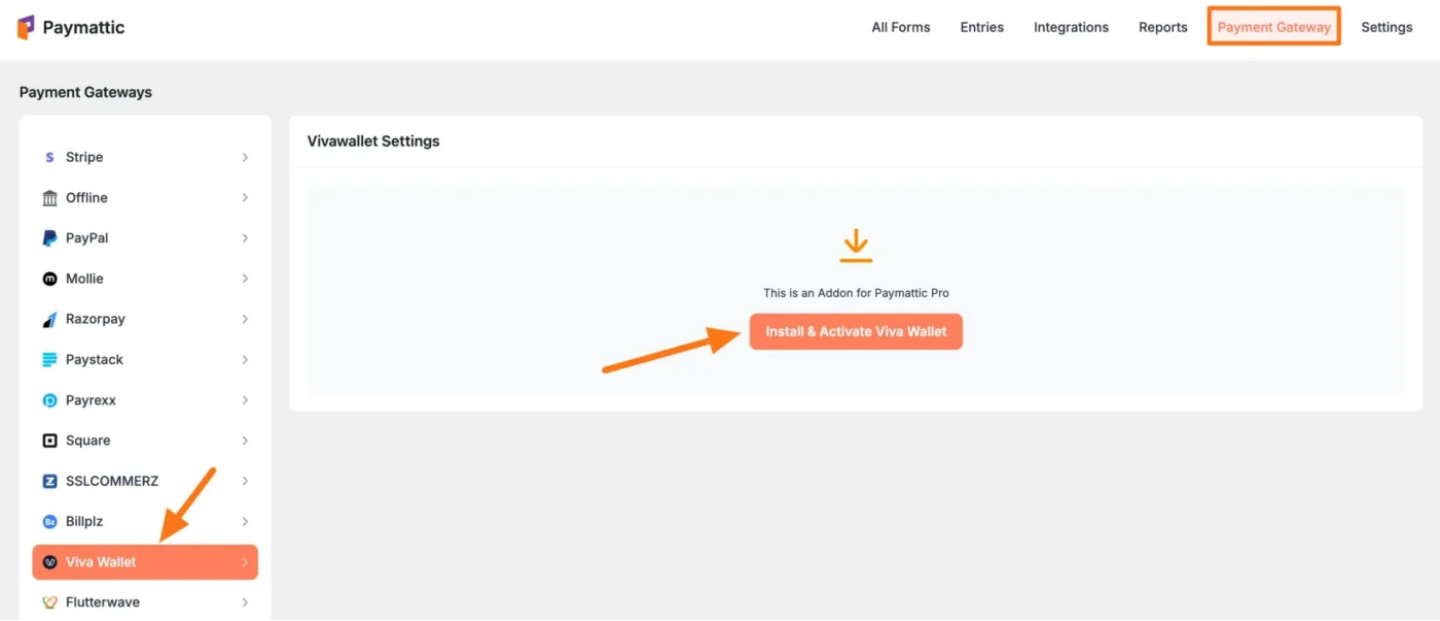

Enabling Viva Wallet Payment Method

To learn how to enable the Viva Wallet payment gateway through Paymattic, follow the steps with screenshots below –

First, go to **Payment Gatewa**y from the **Paymattic Navbar**, click the **Viva Wallet** tab from the left sidebar, and the **Viva Wallet Settings** page will open.

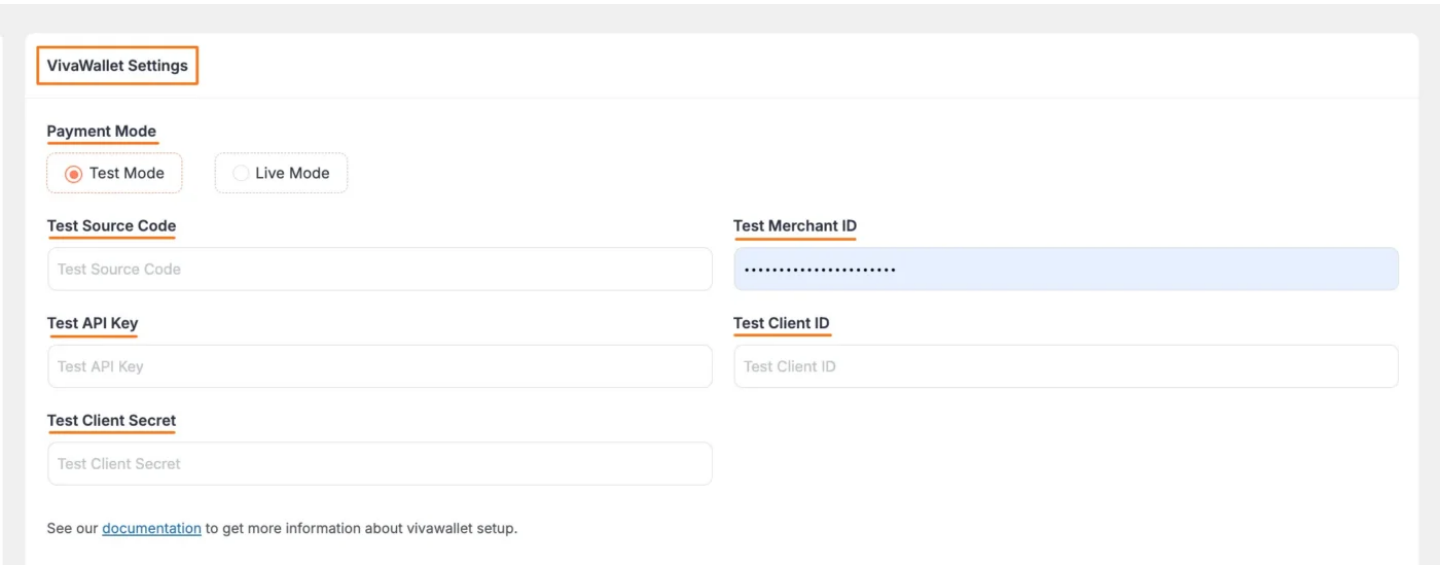

Click the **Install and Activate Viva Wallet** button to connect Viva Wallet with Paymattic Pro.

This add-on needs to be installed the first time you integrate with Viva Wallet.

Select any **Payment Mode** between **Test** (for test payments) and **Live** (for real payments) as both options follow the same configuration process, e.g., I choose the **Test Mode**.

Now, you need to obtain all the necessary Credentials (**Source Code, Merchant ID, API Key, Client ID,** and **Client Secret**) from your **Viva Wallet Account**.

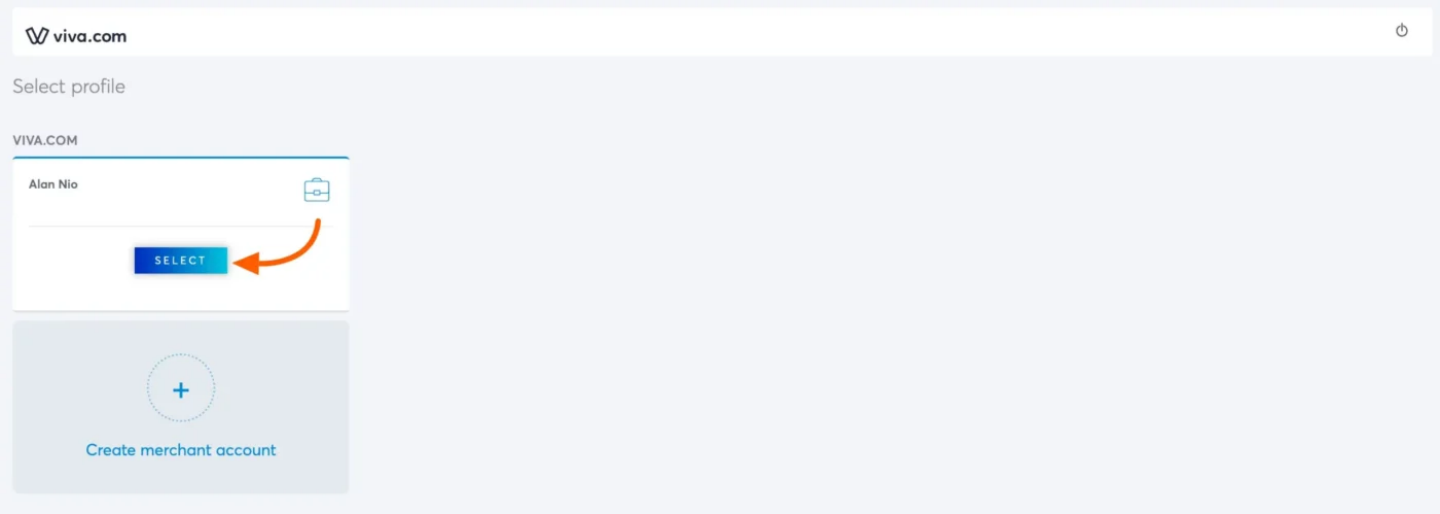

Get All the Credentials from the Viva Wallet

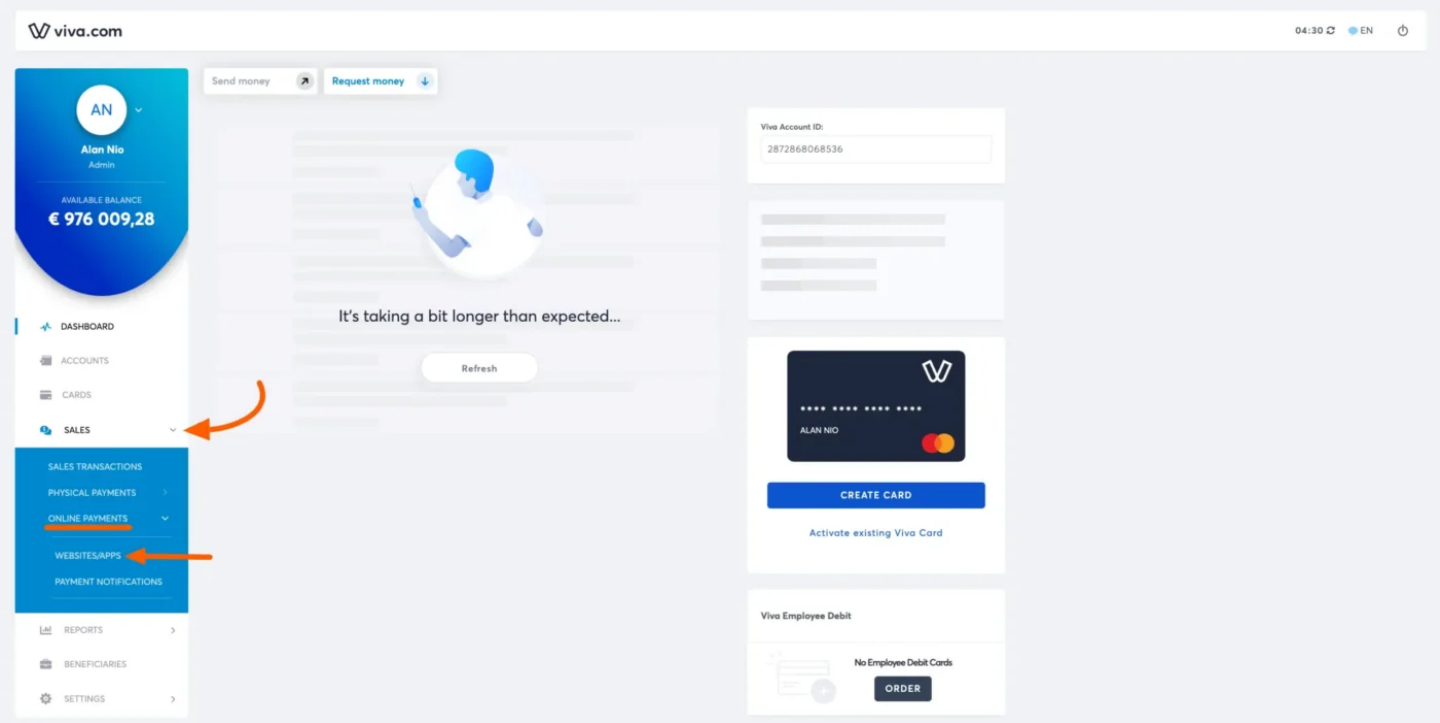

To learn how to get all the Credentials from your Viva Wallet for the configuration, follow the steps with screenshots below –

First, log in to your **Viva Wallet Account** for **Test Mode** and **Live Mode**. If you do not have an account, sign up from here.

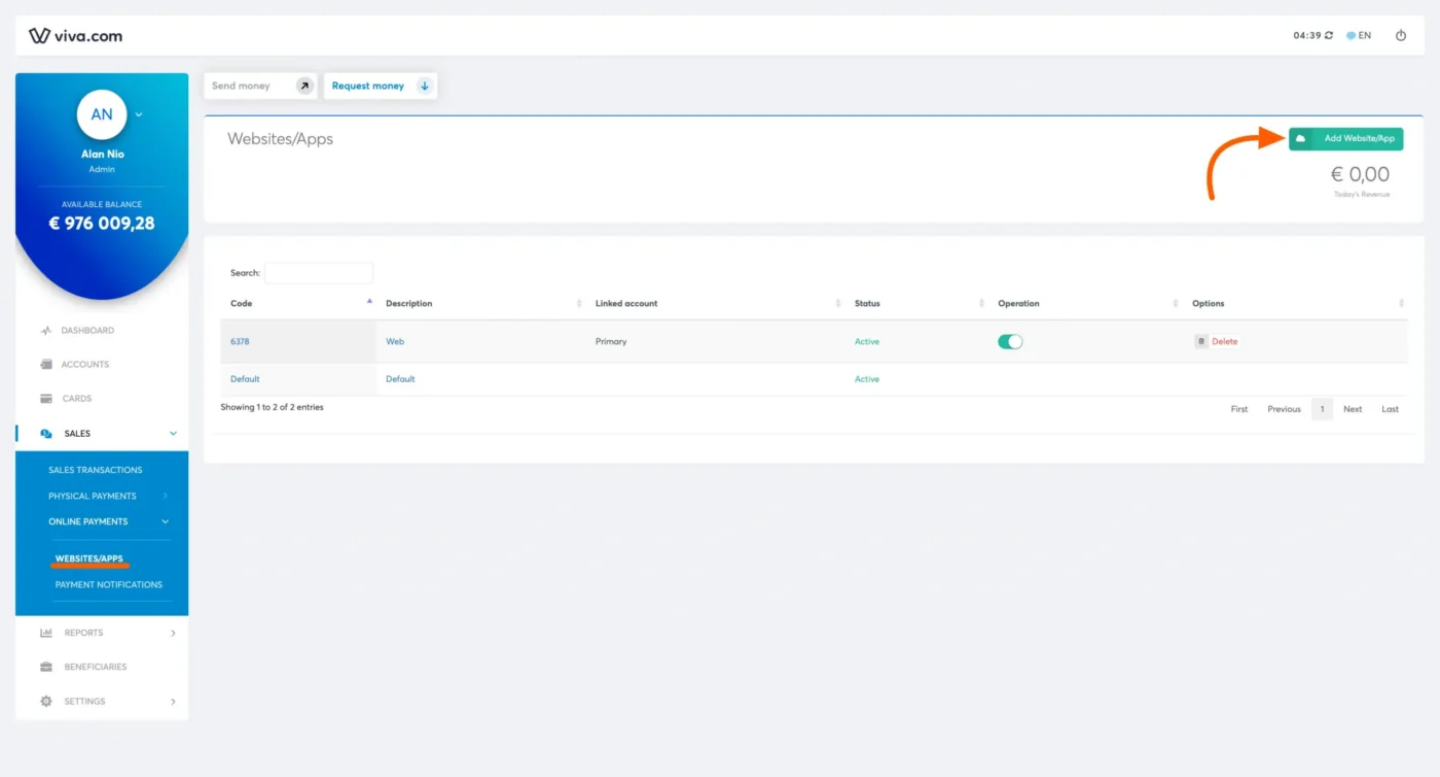

Once you log in to your account, click the **Select** button on your **Viva Account Profile**.

Your Viva Wallet profile settings option will come now. You have to create a Web App now so select the **Sales > Online Payment > Website/Apps**.

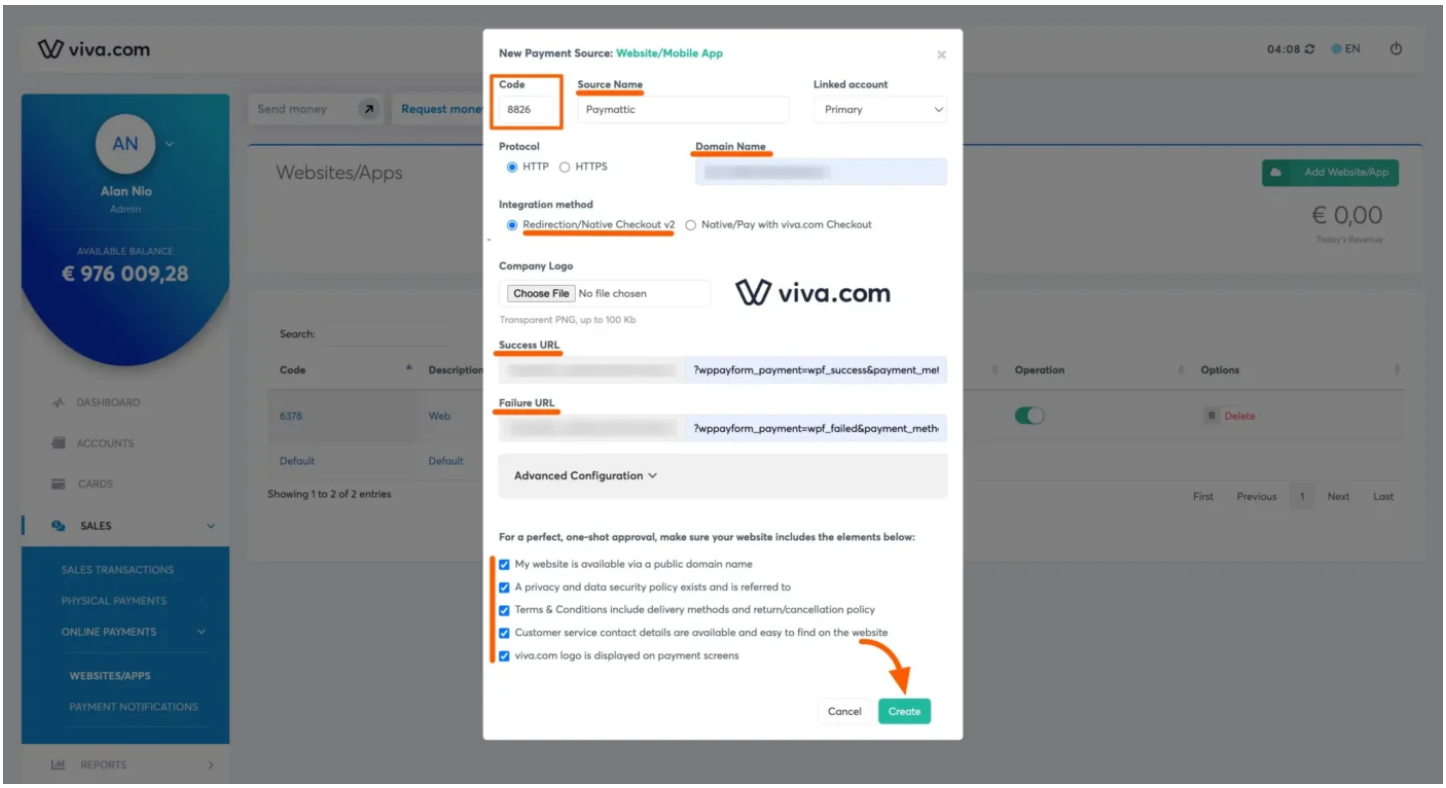

Click on the **Add Website/App** button.

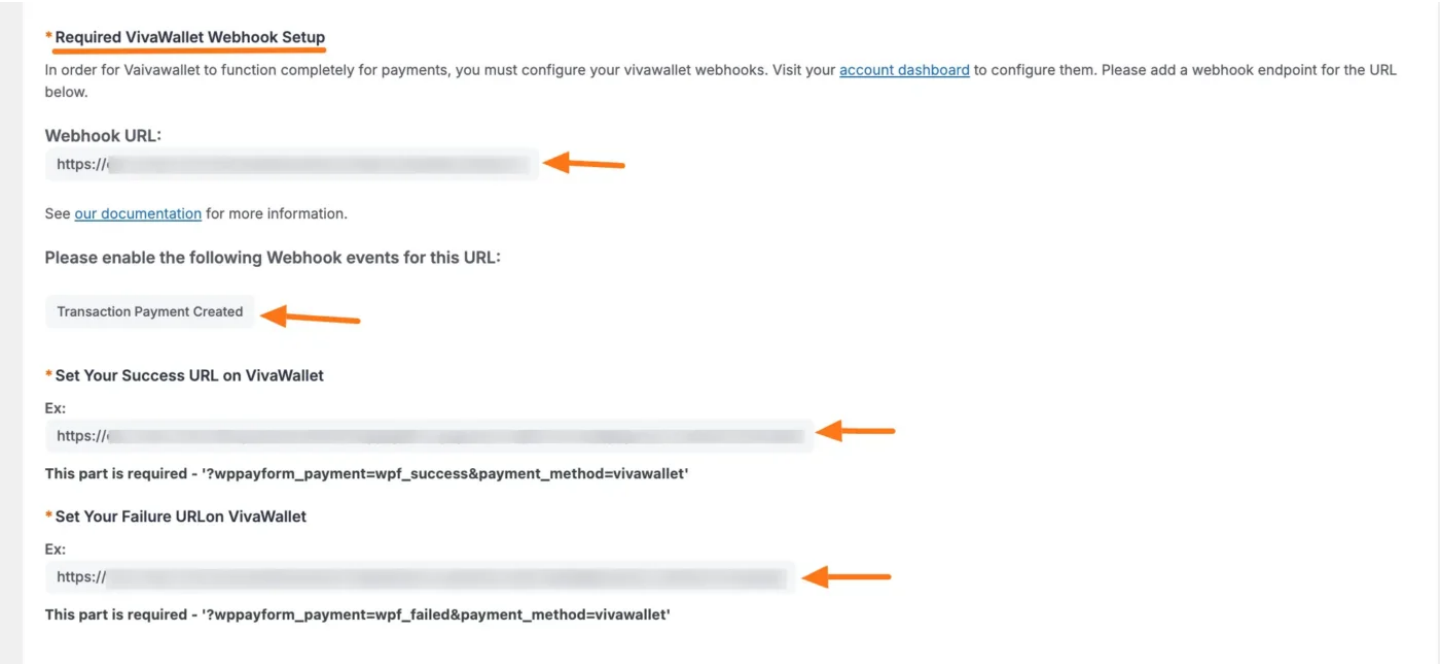

Getting Source Code

Here you will get a **Code** copy of the code for later use. This is the **Source Code** that you have to paste into your Paymattic.

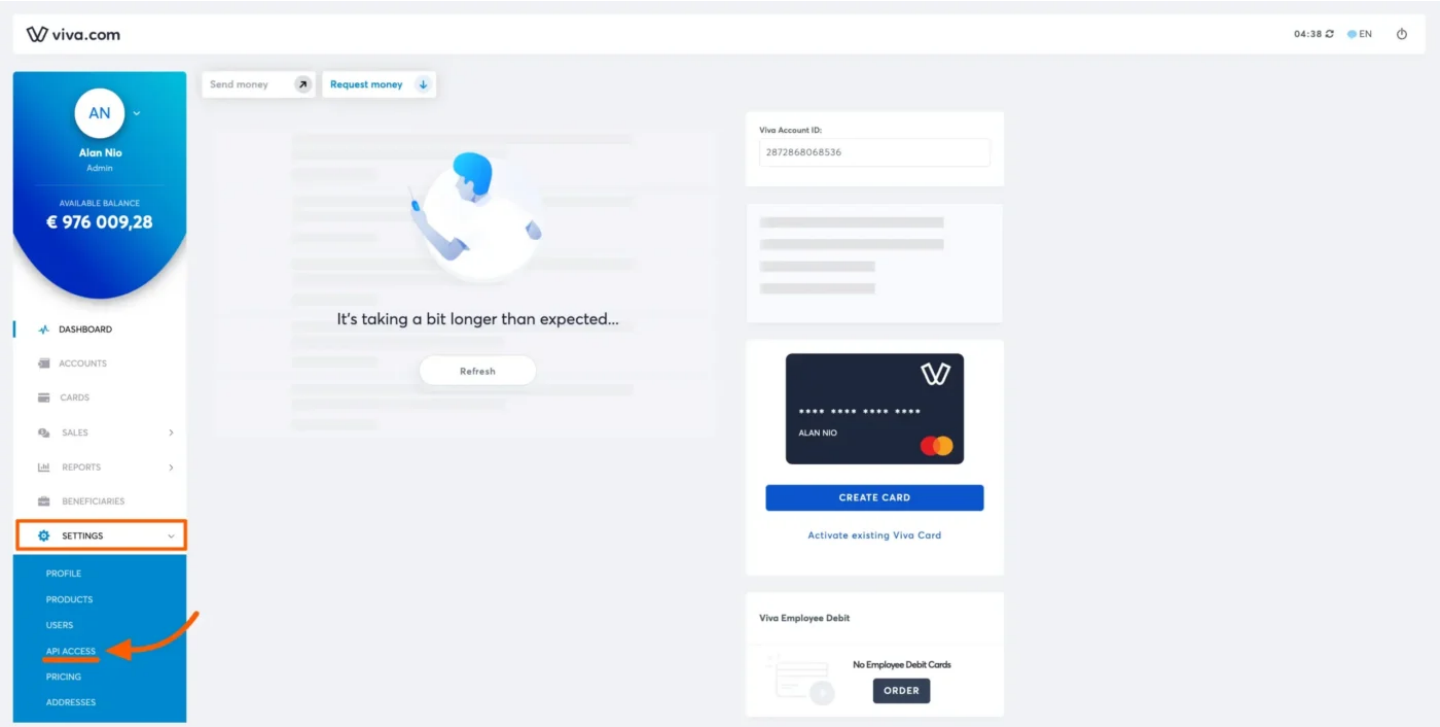

Then give your **Domain name, Success URL, and Failure URL.** Check on all the **Checkboxes** and click on the **Create** button.

You will get your Domain Name, Success URL, and Failure URL in the Viva Wallet Settings option in Paymattic.

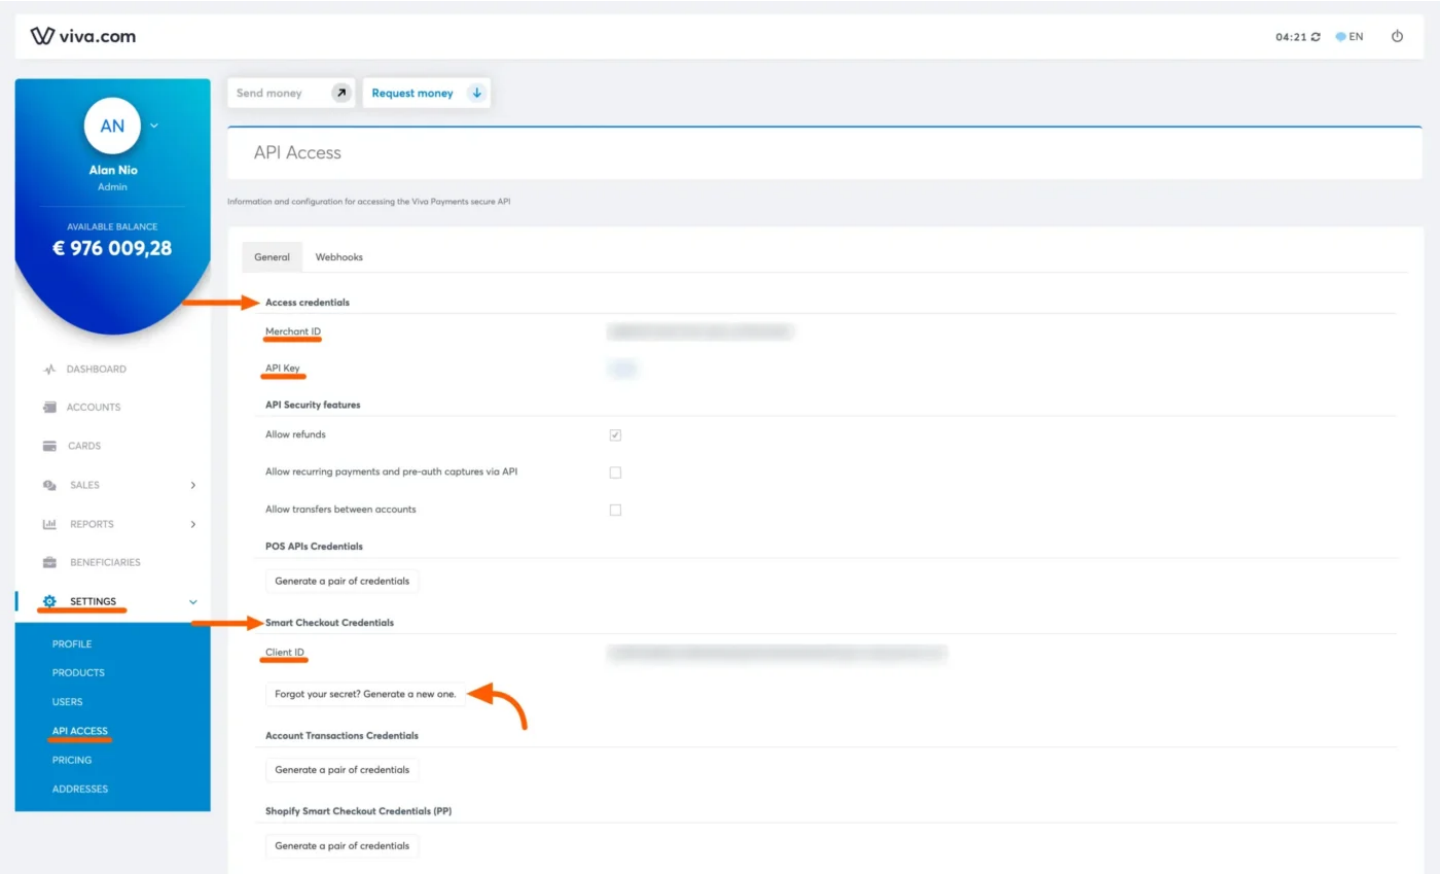

After that, Go to **Settings** of your Viva Wallet profile and click on **API Access**

Getting Merchant ID, API Key, and Client ID

In your Viva Wallet account, you will find the **Access Credentials** section, where you can locate your **Merchant ID** and **API Key**. Additionally, in the **Smart Checkout Credentials** section, you can obtain your **Client ID**. To generate a new secret code, click on the **Forgot your Secret** button.

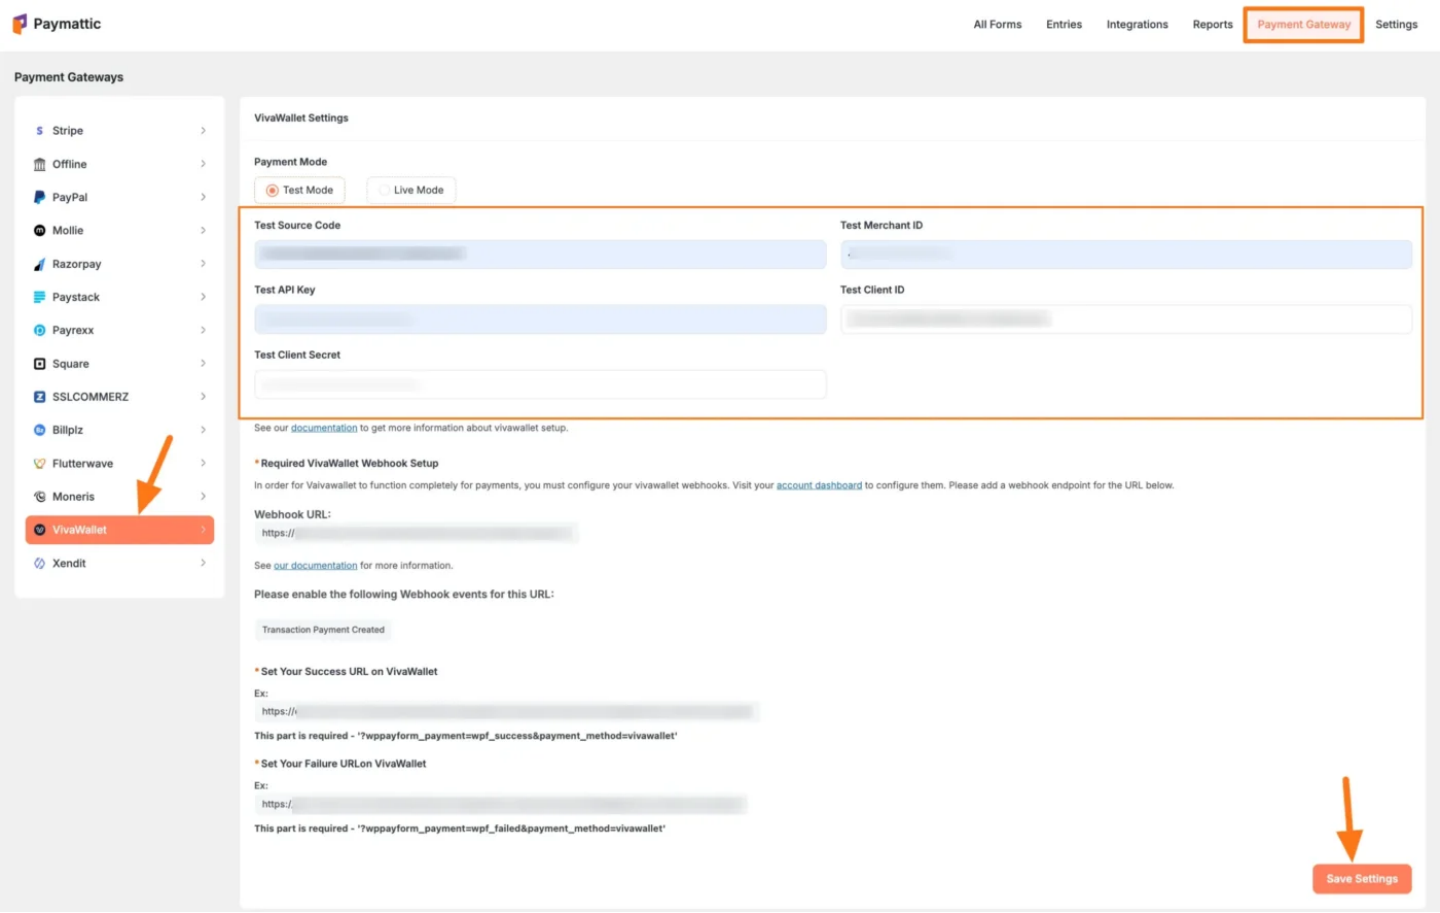

Copy all these credentials to your clipboard.

Configuring Viva Wallet Settings

Return to **Payment Gatewa**y from the **Paymattic Navbar**, click the **Viva Wallet** tab and paste all the **Credentials** you copied from Viva Wallet into the respective fields.

Finally, press the **Save Settings** button and your Viva Wallet account will be integrated with Paymattic for your WordPress Site.

Add Viva Wallet Webhooks

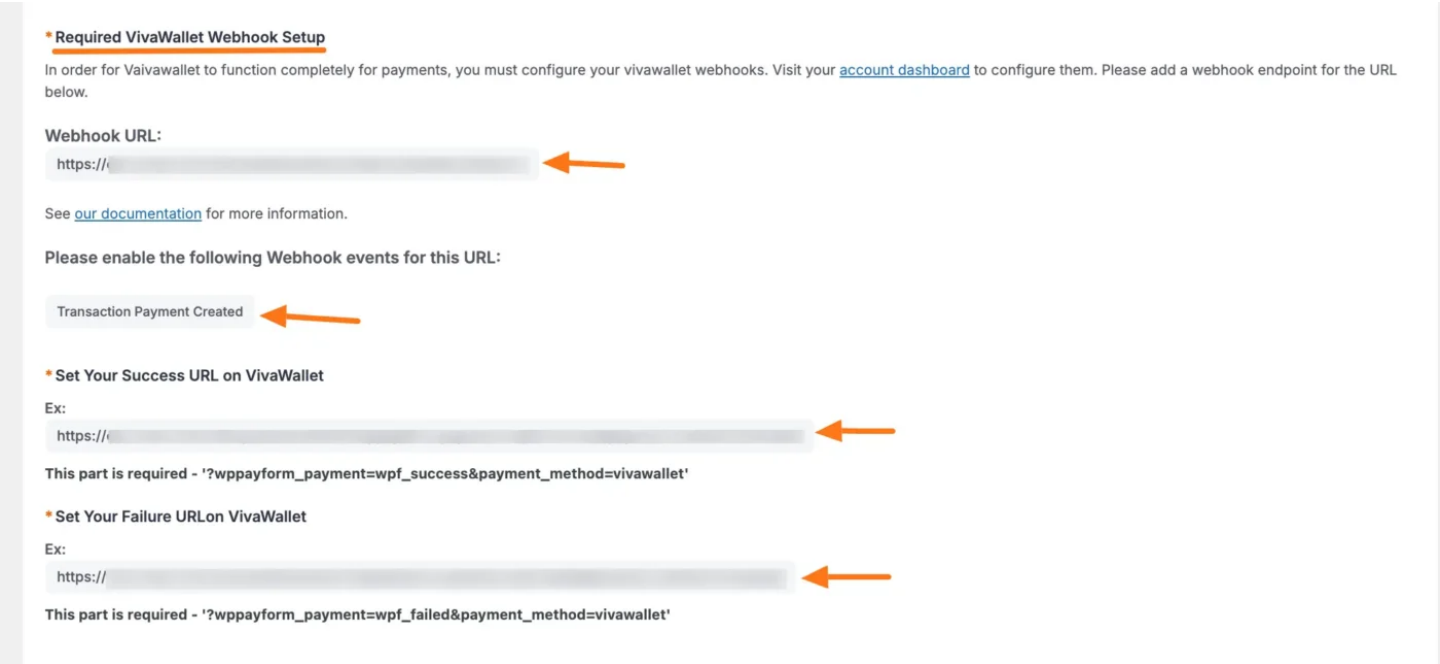

To learn how to configure the **Viva Wallet Webhooks** to your WordPress Site, follow the steps with the screenshots below –

To ensure your Viva Wallet dashboard and Paymattic dashboard are in sync, you must configure the Viva Wallet Webhooks.

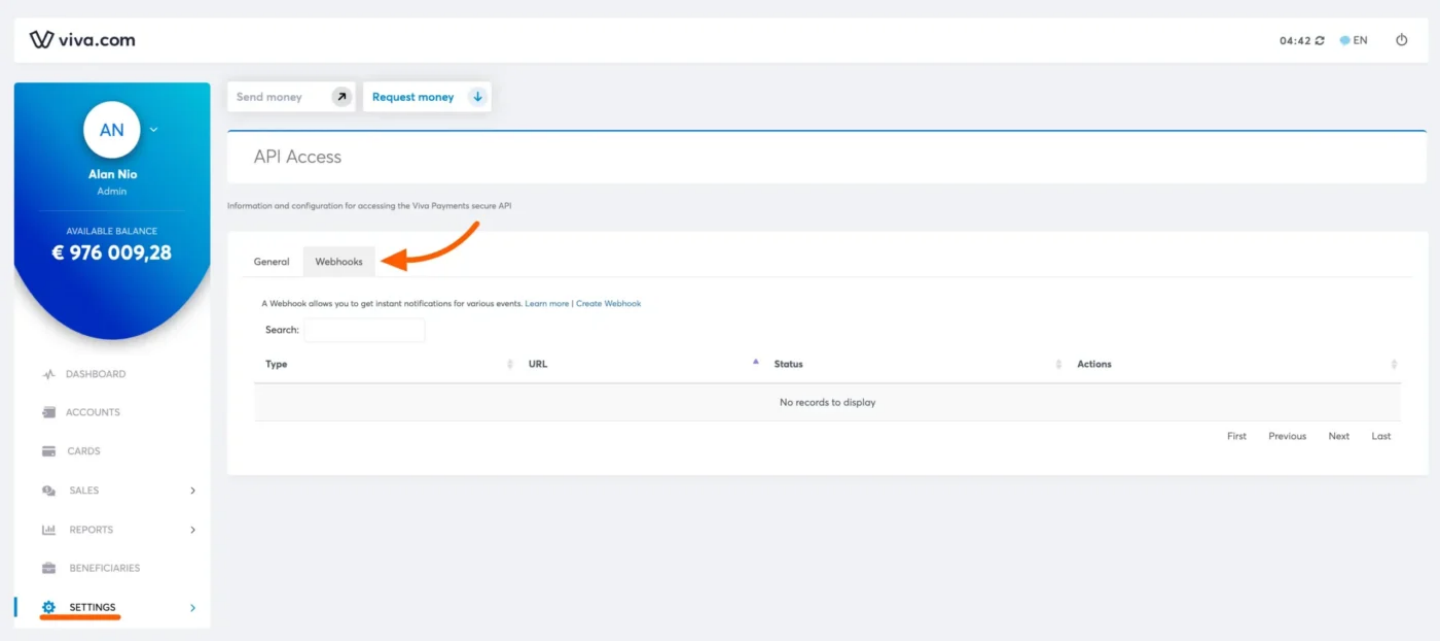

First, copy the **Webhook URL** and paste it to the suggested **Webhook Event** of **Viva Wallet** for smooth transactions based on **Viva Wallet Data.**

Also, copy the **Success** and **Failure** URLs and set them on **Viva Wallet**.

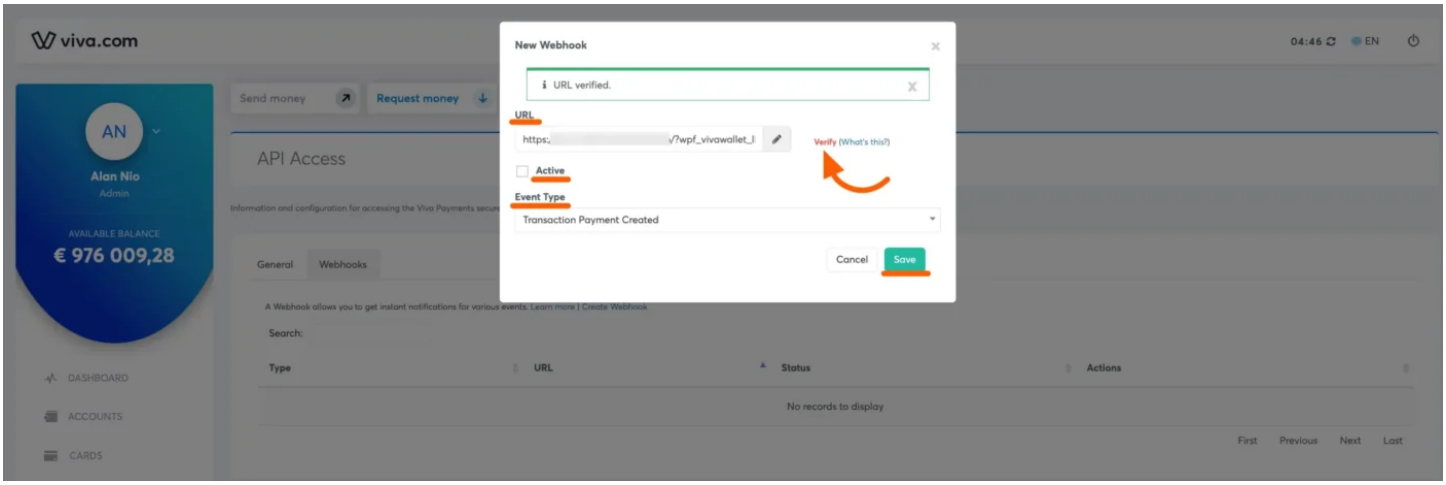

You will need all of them later to configure Viva Wallet Webhooks to your WordPress Site.

Now, visit your Viva Wallet Dashboard, go to the **Settings** section from the left sidebar, and click the **Webhooks**

Now, **Paste** the **Webhook** URL you copied from the Viva Wallet settings page. Check the **Active** box Select **Transaction Payment Created** from the dropdown menu and click on the **Save** button. And, your webhook will be added!

Add Viva Wallet in Forms

Once you finish setting up your **Vivaa Wallet** payment gateway, you can easily add this payment method to any of your existing Payment Form.

If you do not have any existing forms, read Create a Form from Scratch or Create a Form using Templates documentation.

To learn the detailed process of adding a payment method to an existing form, read this Documentation.

But, remember, the added **Vivaa Wallet** payment method in your **Form** will not function unless you complete the configuration process properly.

Currency Selection in Payment Form

In your Payment Form, you have to select the **Payment Currency** according to your Viva Wallet account to make the transaction functional and smooth.

To learn how you can change currency settings for a specific form, read this Documentation.
